

Our revised document for Stage 3 of the project makes the following changes:

- We have included the count queries which show that there are at least 1000 rows in 4 of our database tables.
- There are now screenshots showing the results for the four advanced queries.
- Indexing design has been added to Query 3 and there are screenshots showing the EXPLAIN ANALYZE commands for all 4 queries
- We have updated the analysis and reflection following the indexing portion
